

# ECOSAFE MULTIRES

ZERO WASTE SOLUTIONS

## Food Scraps Collection

The patented EcoSafe® MultiRes program has everything you need to set up or improve a food scraps collection program. Collecting food scraps for compost is the #1 most influential way your residents can impact climate change.

### Cost Savings

Collecting food scraps for compost will decrease the volume of waste sent from your property to landfills, which can reduce costs.

### Certified Compostable Bags

EcoSafe® bags are strong enough to collect and carry all your food scraps without tearing or leaking. In a compost facility, they decompose as fast as a leaf.

### Boost Your Brand

Seamless food scraps collection for any size or style of building will engage your current residents and attract new residents.

### Make it Easy

Get buy-in quickly and increase participation using implementation strategies that are proven to smooth the transition to an efficient waste system.

## About EcoSafe

EcoSafe® Zero Waste Inc. designs food scraps collection programs for every commercial and residential application. We provide 100% certified compostable bags to facilitate the clean transfer of organic materials.

Diverting all organic materials from landfills drastically reduces the amount of methane gas produced, helps create a regenerative, healthy soil product (compost), and build Zero Waste communities across North America.

Make a meaningful difference

## HOW THE PROGRAM WORKS

**Grab** - A resident grabs an EcoSafe® compostable bag from the MultiRes® dispenser to line their kitchen caddy.

**Fill** - The resident fills their lined kitchen caddy with food scraps and organics they accumulate.

**Drop** - They drop their full bags in the central organics collection container.

We chose EcoSafe's MultiRes program [for its] simple, clean, and easy-to-use system for our residents. We've experienced a ton of success. - *Tracy Stemerding*

## We're Here to Help

With over 20 years of experience, the EcoSafe® team and our network of distributors are here to help you get set up, order products, and troubleshoot any issues that you might come across. Our priority is the success of your food scraps collection program, and to ensure that your efforts don't go to waste.
