

ECOSAFE[®] SCHOOL PROGRAM

Food Scraps Collection for Schools

The EcoSafe School program has everything your school needs to set up or improve a food scraps collection program. Collecting food scraps for compost is the #1 most influential way your students, as individuals, can impact climate change.

Inspire Students

Develop a passion for the environment in your students through age-appropriate educational materials and engaging signage.

Certified Compostable Bags

EcoSafe bags are strong enough to collect and carry all your food scraps without tearing or leaking. In a compost facility, they decompose as fast as a leaf.

Included Tools

However your school works, the bins, bags, dispensers, and signage from EcoSafe can be adjusted to fit your exact needs and style.

Green Fundraising

Students can share enthusiasm with the community by fundraising with EcoSafe compostable bags to raise money for school trips, clubs or sports. *Ask for more details.

About EcoSafe

EcoSafe[®] Zero Waste Inc. designs food scraps collection programs for every commercial and residential application while also providing the 100% certified compostable bags to facilitate the clean transfer of organic materials.

Diverting all organic materials from landfills drastically reduces the amount of methane gas produced, helps create a regenerative, healthy soil product (compost), and build Zero Waste communities across North America.

Make composting second nature

HOW THE SCHOOL PROGRAM WORKS

Grab - Custodial staff grabs an EcoSafe compostable bag from a dispenser or box and lines each bin. The right-sized bag will be snug at the top and loose at the bottom.

Fill - Students, staff and cafeteria personnel fill the bins with their left over food scraps and certified compostable products.

Drop - Custodial staff collects the bags from the bins and drops them in the collection container.
