

ECOSAFE[®] OFFICE PROGRAM

Food Scraps Collection for offices

The EcoSafe[®] Office program has everything needed to set up or improve organics collection in your building. Collecting food scraps for compost is the #1 most influential way individuals can impact climate change.

Real Change

Contribute to a greener work environment; diverting food from landfill can help your office gain LEED certification points.

Certified Compostable Bags

EcoSafe[®] bags are strong enough to collect and carry all your food scraps without tearing or leaking. In a compost facility, they decompose as fast as a leaf.

Stay on Brand

Keep the look and feel of your office intact. Select from a range of bins to suit a professional aesthetic and complement your sophisticated environment.

Make it Easy

Get buy-in quickly using implementation strategies that are proven to smooth the transition to a centralized waste system.

About EcoSafe

EcoSafe[®] Zero Waste Inc. designs food scraps collection programs for every commercial and residential application while also providing the 100% certified compostable bags to facilitate the clean transfer of organic materials.

Diverting all organic materials from landfills drastically reduces the amount of methane gas produced, helps create a regenerative, healthy soil product (compost), and builds Zero Waste communities across North America.

Making a meaningful difference

HOW THE OFFICE PROGRAM WORKS

Grab - Custodial staff grabs an EcoSafe® compostable bag from a dispenser or box and lines each bin. The 'right-sized' bag will be snug at the top and loose at the bottom.

Fill - Office workers fill the bins with food scraps and organics that they've accumulated throughout the day.

Drop - Custodial staff will collect full bags from the bins and bring them to the building's waste room.
