

ECOSAFE® MultiRes® Program

Food Scraps Collection for Post Secondary Residences

The EcoSafe MultiRes® program has everything you need to set up or improve a food scraps collection program. Collecting food scraps for compost is the #1 most influential way your residents can impact climate change.

Cost Savings

Collecting food scraps for compost will decrease the volume of waste sent from your residences to landfills, which can reduce costs.

Certified Compostable Bags

EcoSafe bags are strong enough to collect and carry all your food scraps without tearing or leaking. In a compost facility, they decompose as fast as a leaf.

Boost Your Image

Seamless food scraps collection for any size or style of residence will engage your students, and help make your school stand out.

Make it Easy

Get buy-in quickly and increase participation using implementation strategies that are proven to smooth the transition to an efficient waste system.

About EcoSafe

EcoSafe® Zero Waste Inc. designs food scraps collection programs for every commercial and residential application while also providing the 100% certified compostable bags to facilitate the clean transfer of organic materials.

Diverting all organic materials from landfills drastically reduces the amount of methane gas produced, helps create a regenerative, healthy soil product (compost), and build Zero Waste communities across North America.

Make a meaningful difference

FOR COLLECTION IN MUNICIPAL PROGRAMS, WHERE APPROVED, POUR LA COLLECTE DANS LES PROGRAMMES MUNICIPAUX, OÙ APPROUVÉS. CERT #890992

HOW THE PROGRAM WORKS

Grab - A student grabs an EcoSafe compostable bag from the MultiRes® dispenser to line their kitchen caddy.

Fill - The student fills their lined kitchen caddy with food scraps and organics they accumulate.

Drop - They drop their full bags in the central organics collection container.
